<b>Office Action Summary</b>	<b>Application No.</b> 10/715,561	<b>Applicant(s)</b> UKIDA ET AL.	
	<b>Examiner</b> Joanne Silbermann	<b>Art Unit</b> 3611	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Claims 1-4 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 24 February 2006.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted prior art shown in Figure 7 and defined on pages 1 and 2 of the Specification (Figure 7) in view of Ogden, US #4,478,666 in view of Miwa, US #4,625,097.
4. Figure 7 shows an equipment utilizing water comprising operation section 60, member 55, transparent film 59 on member 55 and outer case 51. As shown in Figure 7, members 59, 55 and 51 are tightly formed. Figure 7 fails to disclose making member 55 from transparent material. Ogden shows a control panel (Figure 1) that includes transparent member 16 which includes transparent cover 18 on a front surface and decoration 50 on opposite surface 65 of transparent member 16. In view of the teachings of Ogden it would have been obvious to a person having ordinary skill in the

Art Unit: 3611

art to modify the admitted prior art of Figure 7 by making member 55 transparent since this would allow a decoration to be placed on the lower surface of the transparent member which would allow the decoration/indicia to be protected from damage in a better manner and would help create a more aesthetically pleasing display panel on the equipment utilizing water.

5. Regarding claim 5, the admitted prior art and Ogden teach Applicant's basic inventive concept except for attaching a decoration to a portion of the transparent film. Miwa shows (Figures 1-4) equipment utilizing water (particularly a rice cooker) including upper transparent member 51 including decoration/indicia 52, 53 thereon. In view of the teachings of Miwa it would have been obvious to one of ordinary skill in the art to modify Applicant's Figure 7 by attaching a decoration/indicia to the transparent film since this would allow additional information to be displayed on the display panel as well as to allow the decoration/indicia to be displayed in a more eye-catching and aesthetically pleasing manner.

6. Regarding claim 6, the admitted prior art teaches Applicant's basic inventive concept except for placing a claw and/or boss into which a screw is screw-fitted on member 51 in order to attach the outer member to the rice cooker. Miwa teaches placing boss 39 (Figure 2) which receives screw 43 on a colored member for attaching an outer member to the rice cooker. In view of the teachings of Miwa, it would have been obvious to one of ordinary skill to modify Figure 7 by providing a boss that receives a screw on the colored member since this would allow the outer member to be attached to the rice cooker in a faster, easier and more secure manner.

***Response to Arguments***

7. Applicant's arguments filed 14 March 2007 have been fully considered but they are not persuasive.

8. As discussed in the above rejection, the prior art Figure shows the three layer structure but does not teach the middle layer as being transparent. This is shown by Ogden, see particularly Figure 1 layer 16. Ogden does not teach a rice cooker, but does show a control panel. The combination of the two provides a rice cooker (prior art Figure 7) with a control panel as shown in Ogden. Additionally, Ogden specifically teaches the decoration as being provided on either the front 64 or back 65 of middle layer 16 (column 9 lines 6-9).
